

Maintenance Fee Formula

The following formula will be used in determining Aircraft Maintenance Fees.

$$\text{Aircraft Gross Weight} \times \$0.24 \times \text{Multiplier} = \text{Total Fee}$$

The table below reflects the multiplier used to factor the fee for aircraft age.
(Aircraft with Gross Take-off Weight less than 12,500 pounds)

Aircraft Age in Years	Multiplier
0 - 7	1.0
8 – 15	.9
16 – 23	.8
24 – 31	.6
32 – 39	.4
40 – 47	.3
Greater than 48	.2

For Aircraft with a Gross Takeoff Weight of 12,500 pounds and greater, the following table will apply.

12,500 - 20,000 pounds	\$ 1,600.00
20,000 – 40,000 pounds	\$ 1,800.00
Greater than 40,000 pounds	\$2,000.00

This fee was adopted by the Airport Committee in 2006 and is designed to replace the personal property tax on aircraft previously billed by the County tax office; therefore you will not receive a bill from the County for personal property tax on your aircraft. This fee is billed by the Airport at a rate of 50% in January and 50% in June.
